## COMPANY PROFILE

Creative Recreational Systems, Inc. manufactures, distributes and installs commercial recreation equipment. Since 1972, right from the start, we've earned our customers' respect, business and trust by delivering high quality equipment, backed with 100% dedication to service and support.

Our design team is always ready for a challenge. Every project, large or small, is important to us and we work hard to make sure that you are completely satisfied with the end result. The design phase starts with a phone consultation or site visit where we determine several factors which include: the size of your play area, age group of the children, installation schedule and many other factors. With the help of Google Earth - we are now able to conduct virtual site visits where we can even take the measurements of your site and begin work on your estimate the same day.

Creative Recreational Systems, Inc. now has a lease to own program with Dimension Funding, one of Southern California's most respected equipment leasers'. We understand that funding and fundraising take some time so we have put together an exclusive program that allows you to get the equipment you want without having to wait. Whether it be private organization or even municipalities, we'll be sure to find a solution for you that works.

### Equipment Installation

Our playground parts are purchased from the top manufacturers in the industry. Our commercial playground parts are tough and durable. We even offer individual playground components such as climbers and ADA compliant swing seats or even small parts replacement such as belt swing seats and chains. Creative Recreational Systems, Inc. will always be here for you if you should ever need help with parts replacement.

Creative Recreational Systems, Inc. can conduct playground inspections nationwide but primarily services California, Oregon, Nevada and Washington. All playground installations in the state of California require inspection and certification upon completion. Proper inspections must be performed by a Certified Playground Safety Inspector (CPSI) who has been certified by the National Playground Safety Institute (NPSI).

We have inspectors who have decades of experience doing playground inspections, site evaluations, and playground construction. The National Playground Safety Institute (NPSI) is organized by the National Recreation and Park Association (NRPA), a recreation authority that has more than 22,000 members. CPSI's are certified to inspect the playground for safety issues and to make sure that each playground meets the required standards.

# OUR ADVANTAGES

## Top quality, as a result of professionalization!

In the production procedure, we've applied the most advanced automatic production line and ABB robot welding technology co-developed with Beijing Machinery Automation Research Institute, which makes us more professional and guarantees high quality.

## Good price, as a result of direct selling!

Our direct selling is our way of marketing. We are going to set up our worldwide sales network, so our clients can get the best price directly from our factory.

## High Technology, as a result of innovation!

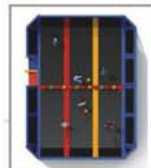

To encourage innovation, we make constant investment and effort on R & D, integration of our industry, and innovated service system.
