# THE FUSION ADVANTAGE

Landscape Fusion specializes in long-lasting outdoor furniture and accessories. Our patented TopCoat® and FusionGuard™ processes enable us to manufacture uniquely plastisol coated products that are unmatched in the industry for both durability and style.

## Our Plastisol Process

begins with heavy duty steel coated with oven cured plastisol.

- › Optimal bonding between the plastisol and steel
- › 90A Durometer surface created for impact resistant comfort
- › Thermal protection: the surface feels *cooler* in the summer and *warmer* in the winter
- › Smooth and consistent coating

**TopCoat®** is our proprietary pigmented agent that encapsulates the plastisol surface with a durable, high gloss finish available in 13 colors.

- › Virtually impervious to common acids, alkalis, salts, sewage, seawater and acid rain
- › Contains UV-inhibitors to protect the finish from fading in the sun
- › Naturally and effectively inhibits the growth of fungus, mold and mildew

**FusionGuard™** zinc-rich primer is used to coat every inch of the undersupport components then sealed with an impervious finish coating.

- › All bench and table undersupport components are protected
- › Welds and frame components highly resistant to rust and corrosion
- › Independent salt spray testing shows FusionGuard™ frames last four times longer than standard powder coated frames

From benches to bike racks, we start with heavy duty steel and finish with our patented TopCoat®. We carefully complete each step in our manufacturing process to ensure that products in the Landscape Fusion family provide the beauty, durability and comfort you deserve.

Unlike other brands, your Fusion products will Not have:

UNEVEN COATING

MOLD & MILDEW

COATING BREAKDOWN

PEELING & RUSTING

SLOPPY COATING

DRIPS

**Fusion products stay looking bright and new for years — resulting in savings to you and the environment.**

Fusion products are warranted for a full **SEVEN YEARS**, so you can be confident in your site furnishing selections.

← **FUSION** products still look new after 2 years

**THEIRS** faded after 2 years →
