HORSECARPET[®]

RESILIENT WOOD SURFACING

*Reduce Stress
for horses ... for you*

HORSECARPET™ has been used in facilities for the past 20 years, as a premium all-weather resilient surface for training tracks, trails, walkways, indoor/outdoor arenas, breeding sheds, show rings, lunging rings, paddock areas and gallops or round pens. HORSECARPET™ consists only of recently harvested wood which has been debarked and is free of soil, leaves, twig material and other contaminants which hasten decomposition. There are no chemical treatments or additives in HORSECARPET™. Positively no recycled wood from pallets or wastewood is used. Recycled wood could result in poor surface stability, and could be contaminated with harmful chemicals and metal.

◆ Lameness Prevention and Rehabilitation

A stress reducing, shock-absorbing, non-abrasive surfacing that helps prevent lameness disorders. Also, an excellent training surface to assist in the process of rehabilitation from previously acquired lameness injuries.

◆ Consistency of Riding Surface

With routine maintenance it is easy to sustain the same density and texture of the training surface, workout after workout.

◆ Characteristic Advantages

The attractive appearance and use of a natural, renewable resource, in addition to the other benefits listed, makes HORSECARPET™ the ideal footing.

"The HORSECARPET™ material is a safe and consistent surface to use. We use it at Calumet year after year in our training barn."

Tony Cissell, Mgr. of Calumet Farm

"The quality and service have been excellent. All of your personnel have made their best effort to ensure that our deliveries have been made in a timely fashion and that top quality has been maintained throughout."

"Sally" Goswell, Pres. of Fair Hill Training Ctr.

"Zeager Hardwood Products are used on all Lane's End Farm horse lead paths, and we have been pleased with their appearance and durability. They provide safe, dependable footing in all types of weather."

Mike Cline, Mgr. of Lane's End Farm
