

Residential Outdoor Cooling & Fog Effects

Be comfortable.

Koolfog high-pressure mist systems drop temperatures by as much as 30 degrees. By employing evaporative cooling principles in our residential outdoor cooling systems, Koolfog creates a pleasant and comfortable environment year-round for you and your family. Dramatically increase the usable living space in your home by adding misting to outdoor rooms, covered patios, courtyards, pool decking, play areas and more.

Be inviting.

Take advantage of the same technology that world-class resorts use to enhance guest comfort by adding a Koolfog Outdoor Cooling System to your home. Friends & family will enjoy the amenity — neighbors will be envious.

Drop outdoor temperatures by up to 30 degrees or create dramatic pure-water fog effects for your landscaping & water features with Koolfog.

Have fun.

Even more, Koolfog offers pure-water fog effects, or fogscapes™, that create dynamic and visually stunning elements to water features, landscapes and more. Add low-lying fog to a coy pond, integrate ‘naturally occurring’ mist into a waterfall, or form a backdrop to landscape lighting. Koolfog is also used to cool pets and provide the ideal environmental control for plants and landscapes. The many uses and applications are only bound by your imagination.

Complete your outdoor living experience with a Koolfog high-pressure misting system.

Be the neighborhood choice for a summer weekend barbecue.

Be confident.

For nearly two decades Koolfog has pioneered outdoor cooling and pure-water fog effects. Our misting systems and fogscapes™ are installed in thousands of residences worldwide. Transform your home into a resort-like atmosphere and experience Koolfog.

Complete your outdoor living experience with a Koolfog high-pressure misting system.

Commercial Outdoor Cooling & Fog Effects

Be inviting.

Koolfog helps create atmospheres that are comfortable, inviting and fun. Our high-pressure misting solutions cool surrounding air by as much as 30 degrees. By employing evaporative cooling principles in our Koolfog commercial outdoor cooling systems, Koolfog provides you with solutions that increase client comfort and enhance client experience. Expand dining to outdoor rooms, provide cooling in cabanas & around pool areas or simply make queue lines more comfortable.

Be creative.

Koolfog can also add new dimensions to your venue. Pure-water fog effects, or fogscapes™, add visual, tactile and dynamic layers to water features, landscapes and other architectural elements. Integrate a natural mist into a water

feature, create low-lying fog amongst trees, or form dramatic backdrops for landscape lighting. The possibilities are endless.

Be exceptional.

Our mission is to provide you with the tools that set you apart. Koolfog solutions are designed to help set a mood, enhance an experience or provide additional comfort. We provide a certain 'wow factor' that guests respond to.

Increase client comfort and enhance client experience with practical and dynamic outdoor cooling and pure-water fog effects for your business.

Hotels & resorts use Koolfog to create relaxing environments throughout their properties.

Misting will draw guests to your establishment as they seek relief from the heat.

Experience Us.

Koolfog has been a pioneer in outdoor cooling and pure-water fog technology for nearly two decades. Our philosophy is to establish long-term partnerships. We pride ourselves in the quality of our technology as much as we do the quality of our relationships. On your next project experience Koolfog.

Koolfog

Amusement & Theme Parks

Be creative.

Add a new dimension to your creation that enhances the sensory experience. Koolfog pure-water fog effects are used to add visual complexity and dynamics to your design while also cooling or humidifying the air. Architects, designers and special effects professionals throughout the world use Koolfog technology to enhance and cool landscapes, water features, dark rides, stages, movie sets and other environments.

Be complete.

Koolfog completes and expands the experience. Clients will see and feel the difference. Imagine the plume of a volcano, exhaust from a rocket, mist hanging low in a swamp, or fog billowing out of a cave — just a few of the possibilities — only bound by your imagination.

Design a fun and safe environment for guests using pure water — rather than chemicals.

Design a fun and safe environment for guests using pure water — rather than chemicals — to produce fog effects

Be confident.

Koolfog has pioneered pure-water fog technology for nearly two decades. Our approach is to collaborate with you in the development and refinement of your vision. Koolfog brings our experience, creativity and enthusiasm to your project. Be assured sure that we will realize your vision with an effective and economical solution that leverages our shared intellectual capital.

Fog effects help create a dramatic entrance to this roller coaster tunnel.

Livestock & Animal Cooling

Be empathetic.

People don't like to tolerate extreme temperatures. Neither do animals. When subjected to heat stress, animals 'shut down' and are faced with an assortment of issues that range from lack of appetite to more serious health problems — even death.

Provide comfort.

Koolfog solutions drop temperature by as much as 30 degrees using the principles of evaporative cooling. Freestalls, holding pens, stables, kennels and more will benefit from the Koolfog evaporative cooling technology. Let us help you moderate temperature and airflow and create the ideal environment for your animals — and your business. Your animals will be cooler, happier and healthier.

Koolfog solutions dramatically drop temperature by as much as 30 degrees.

Exotic birds thrive in the moderate climates created and maintained by Koolfog solutions.

Be smart.

Whatever your discipline there are numerous advantages an ideal environment will provide for your animals and your business. Animals that are comfortable will eat more and resist disease. Even better, milk production increases, mortality rates decline, eggs develop larger and birthing complications diminish.

Horses enjoy relief and better health from high temperatures in Koolfog-equipped stalls.

Be confident.

Koolfog has pioneered outdoor cooling technology for nearly two decades. Our experience in controlling environmental conditions produces results. Our approach is to combine our shared intellectual property to develop solutions that are specific to your needs. If you want to consider providing a positive environmental experience for your animals, experience Koolfog.

Koolfog is used to cool horses, cattle, swine, dogs, birds, zoo animals and more.

Greenhouses

Be creative.

Your business is built on creating and controlling ideal growing conditions. Helping you achieve the ideal environment for your product is ours. Koolfog high-pressure misting and fogging solutions provide humidification or modify temperatures by as much as 30 degrees using the principles of evaporative cooling.

Be smart.

Creating an ideal environment for your plants leads to quantifiable benefits. As temperatures rise, your plants suffer dehydration, disease and malformation. Ideal conditions promote growth and healthy plants. Tomatoes grow larger, flowers bloom earlier, crops turn over faster and the growing season is extended. This translates into cost savings, increased revenue & production and higher margins.

Creating an ideal environment for your plants leads to quantifiable benefits.

Koolfog is used in Greenhouses to create ideal growing conditions for plants

Be competitive.

In today's competitive business environment you need an edge to compete more effectively. Koolfog technology provides that edge through efficient, well-designed systems that increase productivity and produce results. You owe it to your business and your plants to take a closer look at Koolfog.

High-pressure stainless steel atomization lines deliver a fine mist which evaporates to provide cooling or humidification.

Be confident.

Koolfog has pioneered outdoor cooling and humidification technology for nearly two decades. Our experience in controlling environmental conditions produces measurable results. Our approach is to combine our shared intellectual property to develop solutions that are specific to your needs. If you consider environmental control for your plants, experience Koolfog.

Koolfog technology gives you the competitive edge you need to be more efficient and profitable.

stablecool™

A Solution to Equine Cooling Needs

Be aware.

If you have a hard time tolerating the heat, your horses probably do too. With high temperatures comes the danger of heat stress, which often leads to life-threatening conditions (such as heat stroke and anhydrosis). Heat stress can have an overwhelming affect on the health of your horse so you should take appropriate steps to avoid this situation.

Provide comfort.

Stablecool solutions drop temperatures as much as 30 degrees, creating a cool and comfortable environment that keeps your horses happier and healthier. Stablecool operates on the principles of evaporative cooling and combines best-of-breed air movement technologies with our already proven high-pressure misting solutions. Free stalls, stables, corrals and barns can all benefit from Stablecool's innovative approach to equine cooling.

We work with you to develop solutions that are specific to your needs and the needs of your horses.

Simplify.

Stablecool solutions range from systems tailored to individual stalls to systems designed to accommodate large commercial equestrian facilities. Our integrated components for cooling make it easy for you to design and implement a system that will maximize the level of comfort for your horses.

Stablecool can accommodate needs for individual stalls as well as large commercial equestrian facilities.

Be Confident.

Koolfog has pioneered outdoor cooling technology for nearly two decades. Our experience in controlling environmental conditions produces results. If you want to experience the benefits of Koolfog and provide a healthier environment for your horses, experience Stablecool.

Prevent the risks of heat stress by creating a cooler, more comfortable environment for your horses with Stablecool.

Stablecool technology involves the production of water particles perfectly sized for evaporation. As the water particles are evaporated, heat is drawn from the air reducing temperatures by up to 30° F in a matter of seconds.

Be Cool

Be competitive.

Koolfog provides landscapers and pool designers with an arsenal of new design capabilities. Our tactical and visual solutions range from cooling and humidifying plants and people to providing pure water fog effects. These features broaden your design capabilities and add a new and interesting dimension to your creations.

Be creative.

Expand the range of plant life that you can offer your customers by modifying the temperature and humidity of your project site. Include the illusion of naturally occurring mist or fog in your water features & landscapes. Provide backdrops to your lighting. These are all possibilities when you partner with Koolfog.

Employ the same techniques used by world-class resorts, theme parks and entertainment venues.

Fogscapes add a dimension of completion to your project by balancing the effects of lighting, sound and terrain.

Koolfog makes it easy for you to design and implement your vision

Simplify.

With Koolfog's integrated components for cooling & effects, we make it easy for you to design and implement your vision. Koolfog breaks everything down into a series of building blocks that you pick and choose from based upon your project. This unique approach allows you to add features with minimal effort.

Integrating fog into grottos & rock formations not only provides a unique visual effect but also creates 'cool zones' for your clients' enjoyment

Innovate.

Koolfog will position you as an innovator. You will be able to employ the same techniques used by world-class resorts, theme parks and entertainment venues. We provide the 'wow factor.' Why? Because it's cool. It's visible and it's tangible.
