From Humble Beginnings to Industry Leaders

We were founded...

In 1983 Donald Strickland and Anthony Strickland started making seesaws and swing sets out of a converted mechanic's garage. The original Playland was truly a family affair with the father and son team both fabricating and selling the company's products.

Along the way...

In 1990 Anthony Strickland took over the company as President and CEO and set out on a course to develop the beginnings of what is the current product line of modular play systems, originally and fondly named Playland Systems.

The "Playground People" Merger

Playland became a division of Superior International Industries in 1997. SII, as their customers know them, was founded in 1991 by Rob Pepper and Ray Derbecker as a components supplier to both the commercial and residential playground industry. While building on their customer base, they partnered with one of the original founders of Playland, Anthony Strickland, in 1997 to form the new Playland. This new partnership

was unique because, as a group of investors and partners, they have spent their lives in the playground industry. They proudly say that Playland is one of the only playground companies in the market today that has leaders that are lifelong "Playground People."

Today's Playland

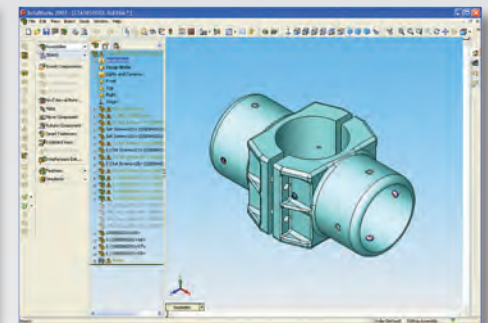

Then and now, Playland's mission is to build high quality commercial outdoor play products at an affordable price while maintaining the highest safety standards in the industry.

With over 300,000 square feet of combined manufacturing space and utilizing in-house technologies of rotational molding, metal fabrication and custom fabric forming, we produce 95% of the products we sell. In a multi-phase manufacturing process, Playland uses Dura-Guard™ Galvanized Weld Protection, a pre-sanding and hand cleaning power prep process, and finally a baked-on powder-coat finishing process.

Engineered for Fun!

Quality engineering returns quality results. The Playland design team utilizes SOLIDWORKS™ engineering software for new product engineering and implementation. We live every day for one simple reason... to design, build and deliver the highest quality products with ultimate PLAY-ON POWER!

ISO Certified

To ensure that you get the best quality product, Playland is proud to announce that we are now ISO certified to ISO 9001:2000 standards. See our certificate on page 133.

IPEMA Certified

In the interest of playground safety, IPEMA provides a 3rd Party Certification Service whereby a designated independent laboratory validates a participant's certification of conformance to ASTM F1487, Standard Consumer Safety Performance Specification for Playground Equipment for Public Use. The use of the corresponding logo in the Playland Guidebook signifies that Playland has received written validation from the independent laboratory that the products associated with the use of the logo conforms with the requirements of the indicated standard. Check the IPEMA web site (www.ipema.org) to confirm product certification.

Playgrounds Packed with Play-on Power!

Take note of an important Playland innovation: the Expedition and Adventure series are two versions of the same design. Expedition playgrounds have 5" diameter steel posts, 48" deck grids and 30" plastic tubes to accommodate larger groups of children. The Adventure series offers the same durability and quality as the Expedition, but on a 3.5" diameter steel post basis with 36" deck grids and 24" plastic tubes -- perfect for limited space and budgets. Both series are fully modular and designed for a wide age group of children (2-12).

Also available is our recycled line. This combines many of our Expedition Series play components with square posts made from recycled plastic milk jug material. Many of our standard Expedition units may be reconfigured to use these recycled posts. The recycled line is available only in a 48" grid with 5" square posts. You can use the following pages to choose a design off-the-shelf or as inspiration for your custom design. Either way, with Playland you get great play value and **Play-on Power!**

“Playgrounds must provide activities that are appropriate for the physical, social, emotional and learning level of the children using the playground.”

-Ken Kutska,
Points About Playgrounds

Age Specific Play

Our catalog is divided into color coded age groups. Each age section includes some of our most popular play structures as well as brand new designs. There are many great choices to fit your needs and budget.

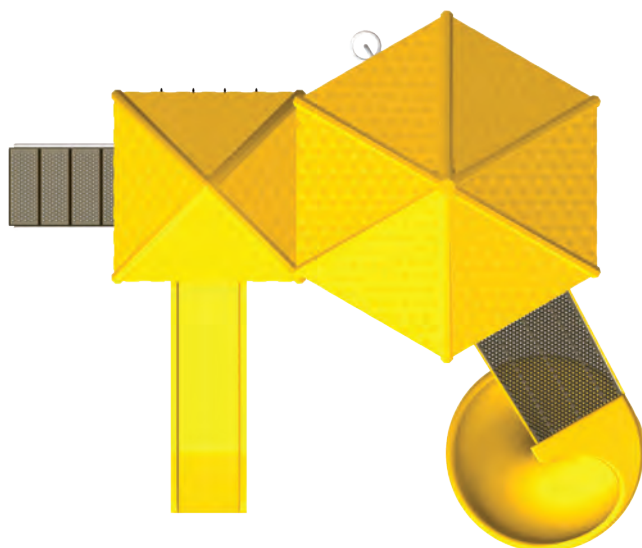

By the Numbers

In addition to age groupings, we also provide vital information for each structure. Play structure Series (Expedition/Adventure, etc.), playstructure unit number, child capacity, actual dimensions, ASTM required use zones. Shipping weight, ADA requirements and a list of all play events are also provided.

Example

| | | EXPEDITION SERIES | ADVENTURE SERIES |
|---|----------------|---------------------------|---------------------------|
| Playstructure ID Number | Unit Number | PS5-00000 | PS3-00000 |
| Budget Information | Unit Price | \$00,000 | \$00,000 |
| Playstructure Capacity | Child Capacity | 00 | 00 |
| Structure Dimensions | Actual Size | 00'x00' (0x0m) | 00'x00' (0x0m) |
| Use Zone Dimensions | ASTM Use Zone | 00'x00' (0x0m) | 00'x00' (0x0m) |
| Shipping Weight | Weight | 0,000lbs (0,000kg) | 0,000lbs (0,000kg) |
| Important Information for ADA Accessibility | ADA Requires | 0 ground level components | 0 ground level components |

“Front & Back” views

Create a fun station one phase at a time

Phasing is an excellent way to limit your initial funding needs. You can match a part of your playground plans to your first year's budget. You can begin with your ADA access point and expand into slides and climbers.

Annual additions, in line with annual budgets, can be made to complete your original playground vision. Note how the unit pictured here was accomplished in three years.

By phasing your playground; landscaping, independent events and site amenities can be included in your budget from the beginning.

So, remember to create a complete plan. We'll show you how to make your fun station one phase at a time!

Mission Control

- Exciting Playground Goals
- Careful Phasing-in of Components
- Annual Budget Line

Example:

| Unit Number | PS3-20460 |
|----------------|---------------------------|
| Phase 1 | \$11,301 |
| Phase 2 | \$5,044 |
| Phase 3 | \$5,210 |
| Total Price | \$21,555 |
| Child Capacity | 44 |
| Actual Size | 38'x22' (12x7m) |
| ASTM Use Zone | 53'x36' (16x11m) |
| ADA Requires | 0 ground level components |

7 Play Events Featuring:

- Rock Wall Climber
- Education Climber
- Tri Rung Horizontal Ladder
- Wave Slide
- Sliding Pole
- ADA Transfer Station
- Coil Climber

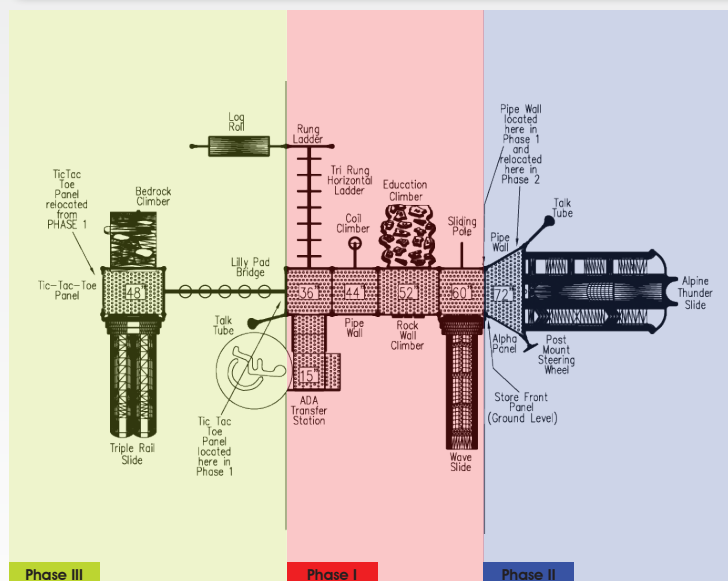

12 Play Events Featuring:

- Alpine Thunder Slide
- Alpha Panel
- Talk Tubes
- Store Front Panel
- Pipe Wall
- Post Mount Steering Wheel

15 Play Events Featuring:

- Bedrock Climber
- Triple Rail Slide
- Lily Pad Bridge
- Log Roll
- Tic-Tac-Toe Panel

Brand New Items from Playland!

Hand, eye and playground coordination

Here, our focus is more on physical challenge. Major muscle development is the source and inspiration for component and playground design. We've zeroed in on this group with challenging horizontal ladders, climbers and slides. By emphasizing popular components and combining them dynamically, our playgrounds create energy, focus attention and create a great new place for social interactions.

The 5 to 12 age group requires wider slide bedways than the younger children. Horizontal ladders may launch from decks up to 36" high and may be as high as 84" off the ground.

With childhood obesity becoming a major issue, Playland is proud to introduce our new Active Series of fitness focused play structures, as shown on the opposite page. This line is a ground based concept that features overhead, climbing, traversing and motion events. Active is the future of play.

We also offer our modular Expedition (5") and Adventure (3.5") series structures for ages 5-12. Pick from one of our many catalog units, or allow us to design one to fit your needs.

You may also choose to go green with one of our recycled series structures using posts made from 100% recycled milk jug plastic.

We've Been to School on PreSchool

For Ages

2 to 5

The focus for this age group is on social interaction; activities that make for great group fun, with just the right level of physical challenge. Activity panels, slides, climbers and swings all meet or exceed ASTM and IPEMA safety guidelines for this age group.

The 2 to 5 age group requires guard rails and barriers at much lower deck heights than the older age group. Deck heights for horizontal ladder launches can only be 18" high. The height of the horizontal ladder itself can not exceed 60" from the surfacing.

Playland proudly offers the Kidscenter™ line for the ages of 2-5. These units are packed with fun and are great for the budget-minded consumer. Offering 3 models starting at \$2,357, KidsCenter™ puts play value back in your playground.

We also offer our modular Expedition (5") and Adventure (3.5") series structures for ages 2-5. Pick from one of our many catalog units, or allow us to design one to fit your needs.

You may also choose to go green with one of our recycled series structures using posts made from 100% recycled milk jug plastic.

Grouping components to meet the needs of a wide age group

For Ages

2 to 12

Sometimes separate playgrounds are not an option, so structures must be created and designed to meet the needs of both age groups. Here are some of the main issues when grouping components:

1. Younger children require barriers on lower decks.
2. Older children require wider slide beds.
3. Overhead ladders must be lower to accommodate younger children.

To accommodate both age groups, both sets of guidelines must be met. You must also make sure to limit use of the playground to one age group at a time or, if not possible, you must ensure there is enough supervision to create a safe environment for all the children.

Playland has comprehensive knowledge of how to put a playground together that meets the needs of the 2 to 12 age group. You design the structure; we will make sure it meets the regulations.

We offer our modular Expedition (5") and Adventure (3.5") series structures for ages 2-12. Pick from one of our many catalog units, or allow us to design one to fit your needs.

You may also choose to go green with one of our recycled series structures using posts made from 100% recycled milk jug plastic.

Unit #23280

This structure is not ADA compliant as shown. Contact us to see how we can modify this design to fit your needs.

12 Play Events Featuring:

- Alpine Thunder Slide
- Talk Tube
- Education Climber
- Below Deck Bench
- Tree Climber
- Rung Ladder
- Lily Pad Climber
- Wave Slide
- Coil Climber
- Store Front Panel
- Post Mount Steering Wheel
- Straight Rung Horizontal Ladder

The Soul of a Fun Machine: Playstructure Components

You can create a magnet for spirited, safe play. Choose from over 100 modular play components. Each one meets a child's high standard for **Play-on Power**. And, each meets or exceeds applicable safety standards.

Design your playground component-by-component or simply choose one of the Playground Portfolio units and customize it. You can choose from many challenging climbers and activity panels that educate and entertain, and the industry's most popular horizontal ladders, tube slides and much, much more.

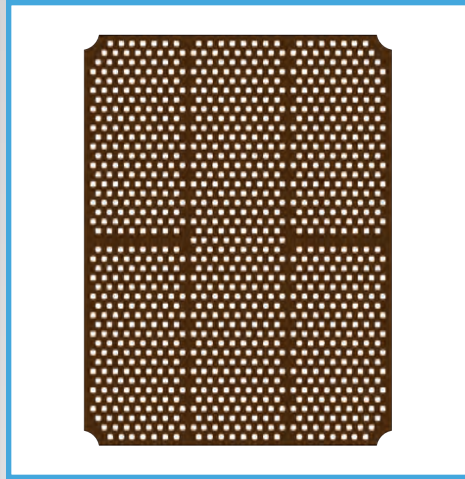

- Decks [Page 65](#)
- Accessories [Page 66](#)
- Stairs/Ramps [Page 67](#)
- Bridges [Page 68](#)
- Horizontal Ladders [Page 70](#)
- Climbers [Page 72](#)
- Slides [Page 76](#)
- Tube Slides [Page 78](#)
- Crawl Tunnels [Page 79](#)
- Activity Panels/Barriers [Page 80](#)
- Roofs [Page 84](#)

Decks

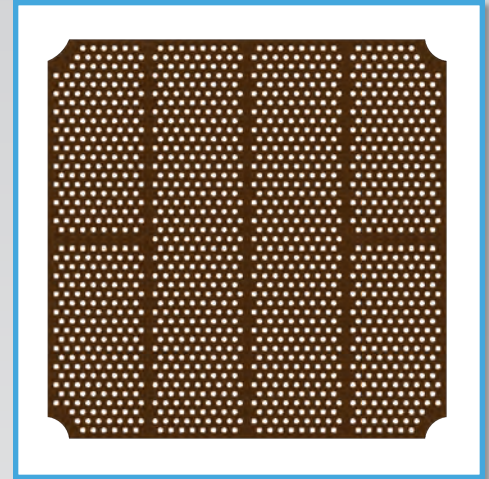

Decks are made from 12 gauge hot-rolled punched steel that is plastisol coated. The perforated surface has holes that are approximately 5/8" in diameter after coating and 1.25" on center spacing between perforations.

All of our decks mount flush to one another or at offset heights to create challenge and interest. Kick plates are available for 8" and 12" offsets to meet required safety standards. See colors on [p.135](#)

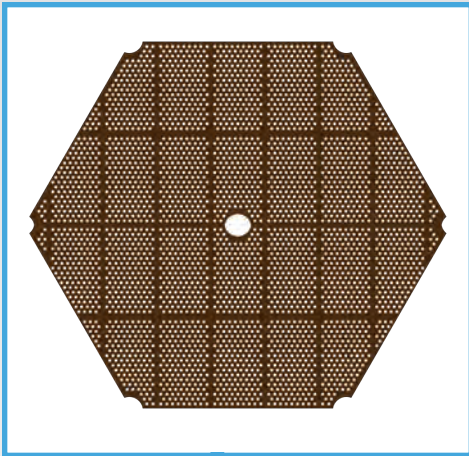

Rectangle

The Rectangle Deck is the essential piece that allows 48" grid components to be used on the 3 1/2" Adventure Series.

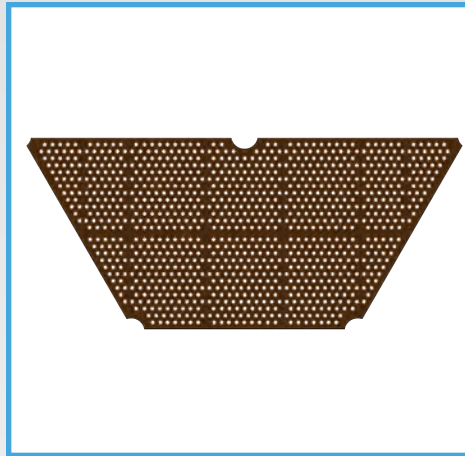

Square

The Square Deck is available for the 36" and 48" grid and is the most basic of our decks.

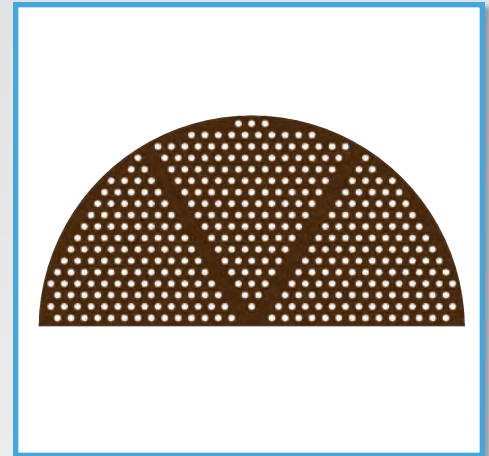

Hex

The Hex Deck is available for the 36" and 48" grid and is the equivalent of six triangle decks.

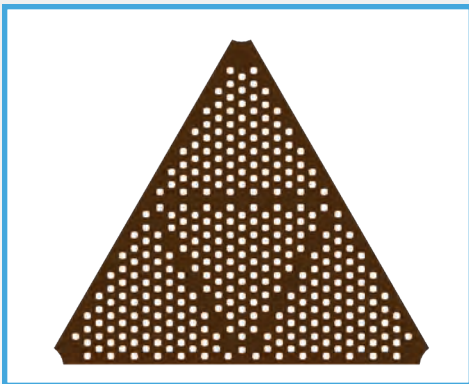

Half Hex

The Half Hex Deck is available for the 36" and 48" grid and is the equivalent of three triangle decks.

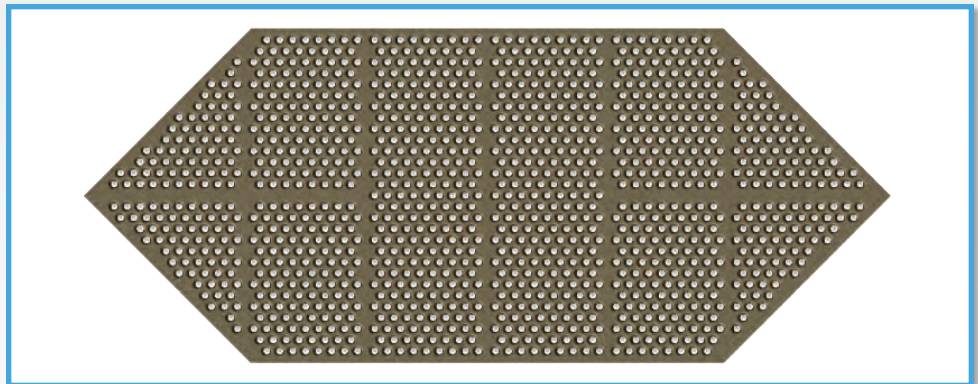

Sun

The Sun Deck is a functional way to increase deck area without the need for additional posts. 48" grid only.

Triangle

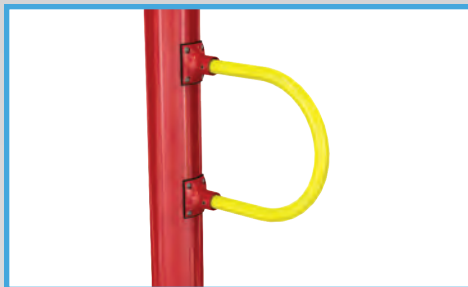

The Triangle Deck is available for the 36" and 48" grid and is the foundation of the hex decks.

Tower

The Tower Deck is designed to allow multi-tier structures up to 9' in height. This is also available for making octagonal deck structures. 48" grid only.

Our large selection of accessories add fun and function to your Playland playstructure.

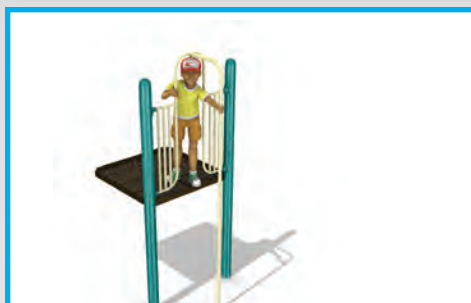

C-Grab Handle

These are a simple way to add hand support in areas where children need a helping hand.

Steering Wheel

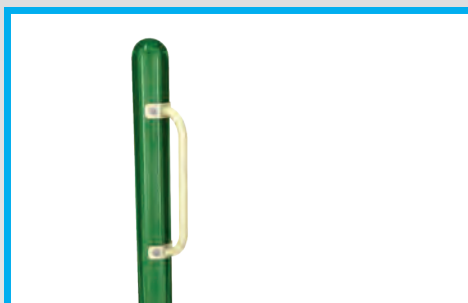

Add fun to you play structure with this post mounted accessory.

Sliding Pole

age 5^{to}12

Deck Heights: 24" - 72"

D-Grab Handle

These handles give a helping hand in tight spaces where C-Grab handles will not fit.

Chin-Up Bar

Another great outdoor gym event. Chin-ups are still one of the best ways to develop upper body strength and stamina. Lower bars can be used for turning.

Talk Tube

Children have fun talking long distance with this great activity. Sound is conducted through underground tubing from one station to another. Talk tubes are used in pairs that can be attached to a playstructure or freestanding (as shown).

Log Roll

age 5^{to}12

The timberland comes to every playground! This balance building event is made rugged with rotomolded plastic in your choice of colors. It rotates on a solid bearing surface. This roll features raised knobs for traction and comes complete with grab handles.

Safety Signs

Every playground needs these essential child designation 3/4" polyethylene signs. Signs come mounted on a 2 3/8" freestanding post. 60 lbs. (27kg)

Item Numbers:
30022025 (2 to 5)
30022212 (2 to 12)
30022512 (5 to 12)
Price: \$212

Panel Ladder

For use between two decks with height differences of: 16", 24", 36", and 48"

Stairs/Ramps

All stairs are available as ground-to-deck or deck-to-deck units. Stairs are made from 12 gauge hot-rolled punched steel that is plastisol coated. Additional features include:

Treads & Stringers

- 12-gauge hot-rolled steel
- Plastisol coatings
- Perforated surface (1.25" o.c. between perforations)

Handrails, Gates & Barriers

- 1.25" o.d. round steel tube
- Powder coating

You can also make your play structure ADA accessible with an ADA Ramp or Transfer Station

Deck-To-Deck Stairs

Available in 21" and 33" deck increments. Also available; ADA 16", 24" and 36" deck increments

Ground-To-Deck Stairs

Available in 24", 36", 48", 60", 72" and 96" deck heights

Single Step

ADA Transfer Station

Deck Heights: 36" and 48"

ADA Ramp

48" grid only

4', 6' and 8' lengths available. ADA ramps can be deck-to-deck or ground-to-deck. These ramps are available with barriers or handrails.

Components: Bridges

All bridges can be used on 3.5" Adventure or 5" Expedition Systems and are in 8' length unless otherwise noted.

*Available in freestanding

**48" grid only

Pipe Bridge

Constructed with durable polyethylene gates and galvanized steel rails with a powder-coat finish. Use between two decks of equal height. Available for 24" to 48" deck heights.

Bubble Wall Bridge

Made from durable rotomolded plastic, our bubble wall bridge is a unique new traversing deck-to-deck climbing bridge. Available in any of our plastics colors. For use on any deck height between 12" to 48". Available in 15.5' length.

Chain Bridge**

age 5-12

Constructed of uni-welded chain with a plastisol coating for more traction. Galvanized steel guard rails with a powder-coat finish. Use between two decks of equal height. 12" to 30" deck heights.

Arch Bridge

Constructed of 12 gauge hot-rolled punched steel with a plastisol coating to increase traction. Side rails are constructed of durable polyethylene. Galvanized steel handrails with a powder-coat finish. Use between 2 decks of equal height. 12" to 72" deck heights.

90° Bridge

Constructed from 12 gauge hot-rolled punched steel with a plastisol coating to increase traction. Galvanized steel guard rails with a powder-coat finish. Use between 2 decks of equal height. 24" to 72" deck heights. 48" and 36" grids.

Inch Worm Bridge

age 5 to 12

Constructed of durable polyethylene with textured finish for traction. Galvanized steel frame with powder-coat finish. Torsion pivot base for side-to-side motion. 24" deck height only.

Challenge Bridge

age 5 to 12

Constructed of durable polyethylene with a textured finish for traction. Galvanized steel frame with powder-coat finish. Use between two decks of equal height. Available for 12" to 30" deck heights.

Lily Pad Bridge*

age 5 to 12

Constructed of durable polyethylene with a textured finish for traction. Galvanized steel frame with a powder-coat finish. Use between two decks of equal height. Available for 12" to 48" deck heights. Also available as ground to deck.

Suspension Bridge

One piece bridge for durability and ease of installation. Constructed from 12 gauge hot-rolled punched steel with a plastisol coating to increase traction. Galvanized steel guard rails with a powder-coat finish. Use between 2 equal deck heights. Available for 12" to 72" deck heights.

Horizontal Ladders promote physical fitness and develop upper body strength as well as hand-eye coordination. They connect between decks or from an end climber to a play system. They can also be ordered as freestanding events with two end climbers. Horizontal ladders are available for Adventure Series, Expedition Series or freestanding units, and are powder-coated to your choice of colors. See Page 135 for color selection. *End climber will be replaced with our new design as seen on Pages 98-99.

Wavy Deep Rung

Another great challenge. Large hand hold areas plus asymmetrical heights make this a #1 eye-hand coordination, upper-body developer.

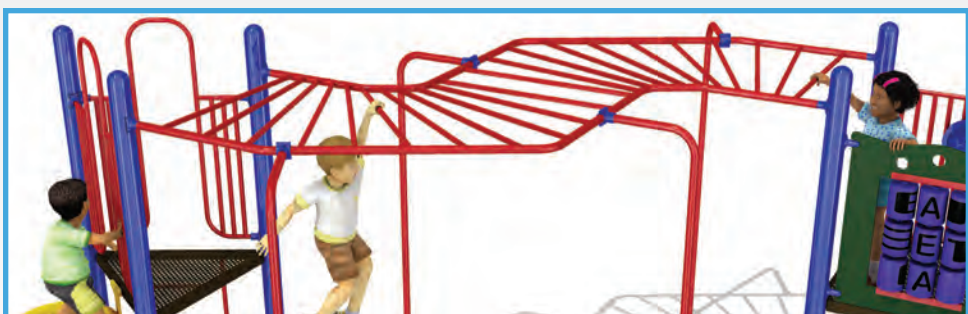

270° Circle Ring

Metal hoops welded to a 270° circle make this a single deck launch play event. 48" Grid Only.

Track Ride

Children glide easily along this high quality Track Ride. Aluminum housing protects track mechanism giving you years of track riding fun. Heavy duty handle with one-of-a-kind self-braking system that keeps the handle from being thrown end-to-end.

Offset Straight Rung

This is your fun connection for offset decks! Twists and turns make this ladder even more challenging.

Wavy Straight Rung

This horizontal ladder provides great play-on-power! The horizontal ladder no playground should be without.

Trapeze Ring

A Playland favorite! These sturdy polished aluminum trapeze rings attach to the frame with clevis fasteners for safety.

360° Orbital*

Fun comes full circle with this straight rung ladder. A great challenge for every child who wants to make it all the way around! 48" Grid Only.

Arched Straight Rung*

With its incline and decline, this horizontal ladder adds a new fun look to your playground.

Single Parallel Bar

The classic hand-over-hand bar. While appropriate for all ages, this is a great first step play event.

Double Parallel Bar

A great variation on the single parallel bar, this event is even more of a challenge and is just great fun.

Rapid Rocker

This event provides an advanced upper body workout. A challenging piece that promotes coordination, dexterity and fun for the older child. 5" only.

Tri-Rung

The Horizontal Ladder for any child ages 2 to 12. The big handles make gripping easy. And the angled ladder makes this an exciting deck-to-deck design element.

Loop Rung*

Each looped rung requires hand over hand reaching. Hands, wrists and forearms get a real workout, as well as the upper body muscles.

Climbers are available in a wide variety of shapes and sizes. From Playland favorites like the Tire Climber, to the offset ascension of the Bubble Wall Climber, these activities provide fun and challenging deck access. Plastic climbers are rotomolded with UV stabilized plastic. All metal climbers are available in any of our powder-coated finishes. See page 135 for color selection.

When specifying your climber designs, note the available deck heights. Just indicate the type of climber you want and a Playland representative will make sure it is installed at the correct deck height.

*48" grid only.

Please indicate straight or curve (left or right).
Curved Chute Slides not available in 48" deck heights.

Triple Chute (Straight or Split)

Deck Heights: 60", 72", 84", 96"

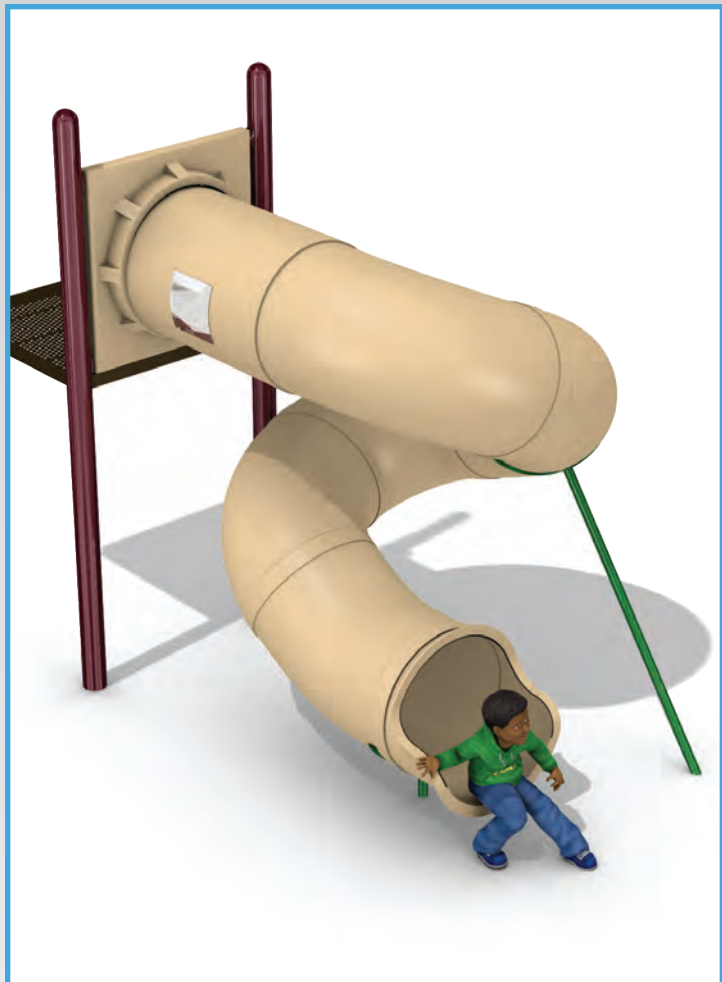

Components: Tube Slides

Sliding fun begins at the top of a tube slide! Our rotomolded high-strength plastic slides are available in 24" (36" grid) or 30" (48" grid) diameters in any of our plastic colors. See page 135 for color selection. Slides pictured below are 30" diameter. Four different configurations (straight, zigzag, 360° and 90°).

Straight Tube Slide

Deck Heights: 24", 36", 48", 60", 72", 84", 96"

360° Tube Slide

Deck Heights: 72", 84", 96"

Please note when planning to indicate zig-zag left or zig-zag right.

Zig-Zag Tube Slide

Deck Heights: 36", 48", 60", 72", 84", 96"

Please note when planning to indicate curve left or curve right.

90° Tube Slide

Deck Heights: 36", 48", 60", 72", 84", 96"

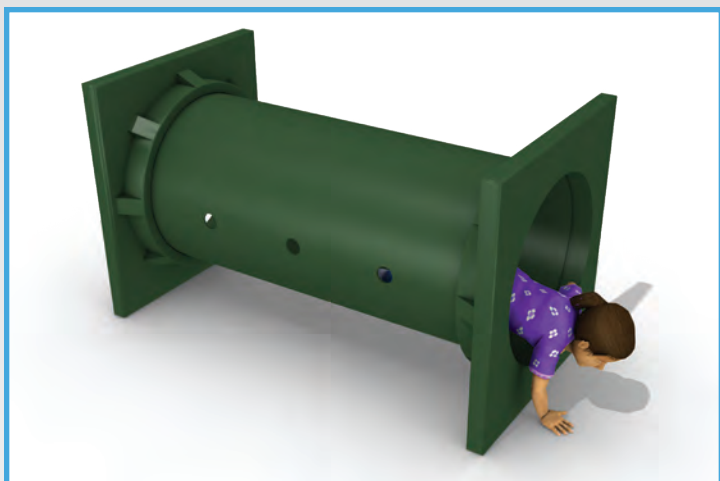

Crawl tunnels connect decks of the same or offset heights. They can also be designed to be freestanding. Crawl tunnels are made of high quality rotomolded plastic and are available for Adventure Series or Expedition Series in any of our plastics colors (see page 135 for color selection). All crawl tunnels come with spy holes for easy supervision of children and are available in 24" (36" grid) or 30" (48" grid) diameters. Other features include:

- 1st quality LDPE
- 3/8" wall thickness
- UV stabilized
- Anti-static inhibitors

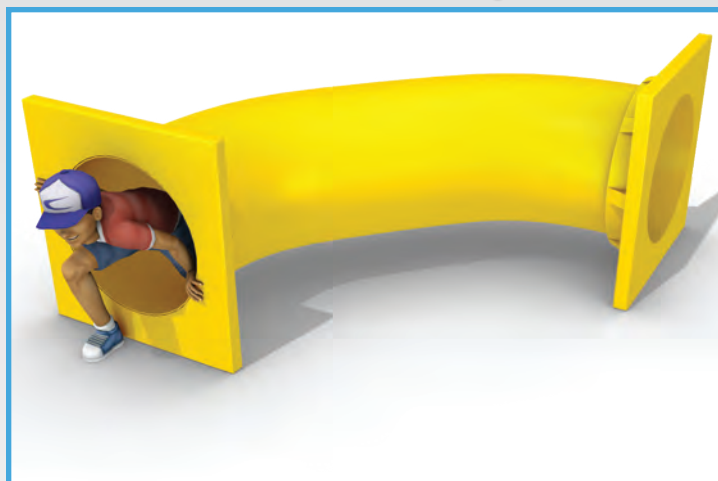

Inclined Crawl Tunnel

Connects two decks at 6", 12" or 24" height increments

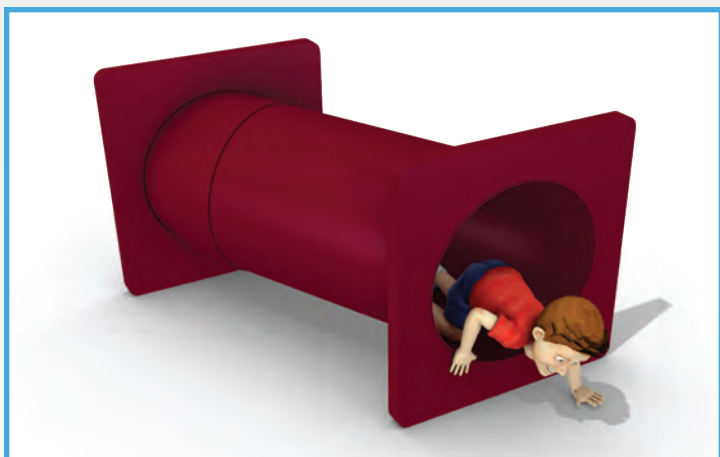

Straight Crawl Tunnel

Connects two decks of same height.
Lengths as shown in your Playland diagrams.

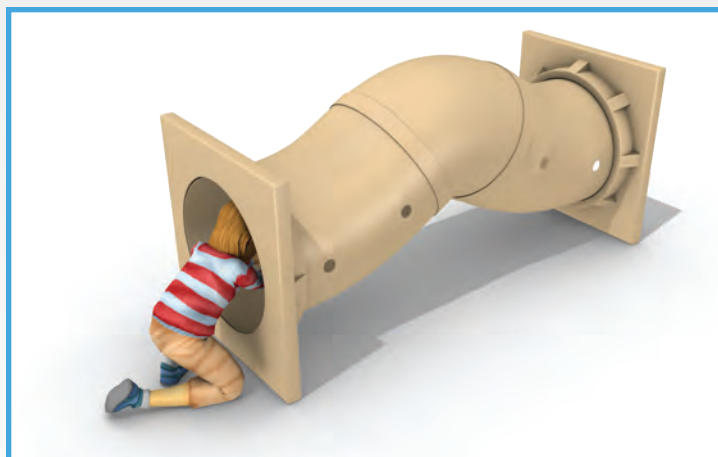

Curved Crawl Tunnel

Connects two decks of same height.
Degrees of curve as shown in your Playland diagrams.

Zig-Zag Crawl Tunnel

Offsets two decks of same height by 24".

Wavy Crawl Tunnel

Connects two decks of same height.

Components: Activity Panels

Activity panels are available for 36" and 48" grids. They can be installed at deck level, below deck heights greater than 48" or freestanding.

All panels are constructed of 3/4" heavy duty high density polyethylene (HDPE) sheet plastic. They resist fading and warping for a lifetime of activity.

See page 135 for color selection.

Traffic Signs

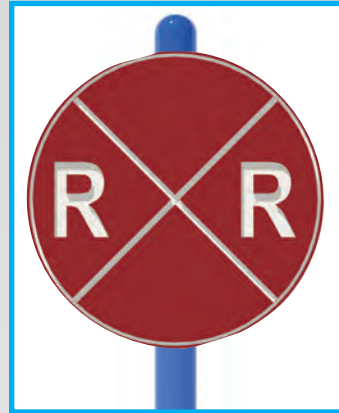

No trike path is complete without these new traffic direction accessories. Each sign is made of the same heavy duty HDPE plastic used in our 36" and 48" activity panels. They resist fading and warping for a lifetime of imagination. Each sign includes a post and mounting hardware.

Stop

Yield

Railroad Crossing

No Parking

Barriers

These devices are essential for directing traffic throughout the play structure. Barriers keep decks safe, but they can also be an important play element. As pictured here, barriers can be plain pipe walls or play activities, such as a pipe wall with wheel.

See page 135 for color selection.

Pipe Wall

Pipe Wall w/Wheel

Roofs are an essential part of your playground environment, providing shade for hours of safe fun. They are also an important feature in the design of your playground.

Roofs are available to fit both Expedition and Adventure series. Choose whatever color you like from our color selection on page 135.

We also offer an archway to enhance the look of your playground. Plan archways into any deck that you wish to accentuate as an entryway, or use them to balance your playground visually.

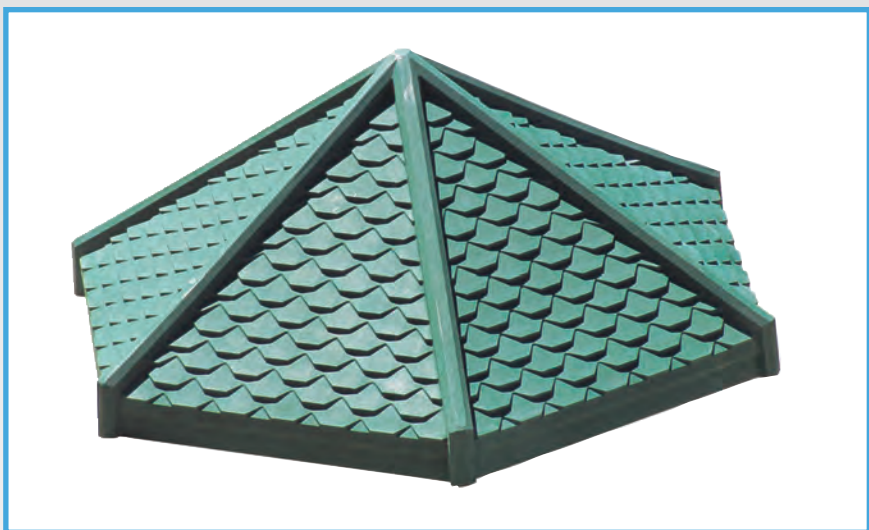

Modular Shade Roof

Reduce UV exposure and provide a color play environment with a modular shade roof. Additional shade products shown on page 128. Fits Square Decks Only.

Arch Metal Roof

Add a classic architectural touch to your playground with our Arch Metal Roof.

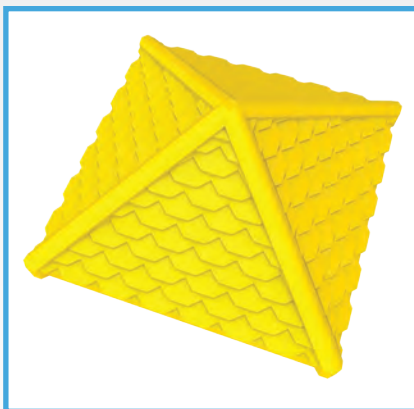

Hex Roof

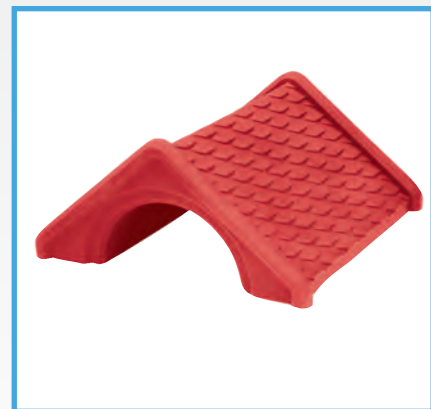

Archway

Give a playground a grand entry with an archway. Looks great when used with Arch Metal Roofs.

Square Shingle Roof

Gabled Shingle Roof

Touch the sky with a wide range of swings

Get all the swings you need from Playland! We have full bucket and half bucket seats for preschoolers and belt seats for children 5-12 years old. These are tough, all-season swings made for lots of heavy use. They come in a variety of colors to match your playground color scheme. Please note that you can order standard galvanized chain or easy-on-the-hands yellow plastisol coated chain. Coated chain adds color and comfort to every swing event! Clevis fasteners are standard on every swing. This child-friendly hardware is the best way to meet safety standards.

Playland also offers the most popular options for swing structures: bi-pod frame, tri-pod frame, single post frame and arched frame. The entire single post and arched frames are coated to any of our post color selections (see page 133 for the Playland color palette). The bi-pod and tri-pod frames come with powder-coated junction sections and galvanized frames.

Easy steps to designing your swing set

Select swing set frame type

- Bi-pod
- Tri-pod
- Single 5" Post
- Arched 3.5" or 5"

Choose the type(s) of seats

- Belt
- Bucket
- Half-Bucket

Pick type of chain

- Standard Galvanized
- Yellow Vinyl Coated

Select swing set frame

For example: 1,2,3 or 4 bays
(Each bay holds 2 swings)

Select colors

Seat color choices on pages 89-90

5" Arch Swing Frame

This swing is the ultimate in strength and structural integrity. This is the heavy use champion! The 5" Arch Swing frames are constructed of the same high quality 5" steel tubing used in the Expedition Series. The top bar is also 5" tubing. The entire frame is powder-coated to match your playground. See page 135 for color selection.

Note: Swing frames come with hangers but not seats or chain. Order swing seat and chain sets from pages 89-90.

| Description | Item Number | Use Zone | Weight | Price |

| 5" Arched, 8' - Add-A-Bay | 90915500 | 24'x32' (7.3x9.8m) | 230 lbs. (104 kg) | \$1,106 |

3.5" Arch Swing Frame

This simple architecturally styled arch frame is a fun swing alternative. The 3.5" Arch Swing frames and 2 3/8" top bars are constructed of the same high quality steel tubing used in our play structures. The entire frame is powder-coated to match your playground. See page 135 for color selection.

Note: Swing frames come with hangers but not seats or chain. Order swing seat and chain sets from pages 89-90.

Bi-Pod Swing Frame

This is your basic swing for fun. The Bi-pod frames use 2 3/8" galvanized pipe for the legs and top bar and powder-coated aluminum castings for their junctions.

See page 135 for color selection.

Note: Swing frames come with hangers but not seats or chains. Order swing seat and chain sets from pages 89-90.

***Powder coated frames available for additional charge.**

****For swing pad with beveled edge see page 91**

Complete your playground with Independent Events.

Independent play structures are a great way to provide an alternate play environment for a child. While the main playground structure is great for group play, these bright imaginative play components attract one or perhaps a few children at a time creating a whole new play experience. They can provide a needed rest from the crowds on the playground.

Independent ground level events are also a requirement for the ADA guidelines. It is important to give every child a fun, challenging environment.

You will find in the following pages a complete range of age appropriate equipment. As always, be sure to note safe use zones.

Choose From Over 60 Independent Play and Freestanding Events!

Fitness Course

The Fitness Course is designed to provide levels of challenge for older children and adults. Available signage explains the various events and gives suggestions for physical programs and warm-up/cool-down routines. The events can be laid out as shown, along a pathway, or configured to fit your area. The same high quality materials used in Playland's playground equipment are used to build the Fitness Course - providing the same strength and durability! Choose one color for posts and one color for metals from page 135.

Turn any Playground into a Park with Outdoor Furniture

Our outdoor furniture stems from 27 years of experience in developing and manufacturing commercial playground furniture. Over time, we've tried and tested our products in a host of environments, climates and settings - from the Great Lakes up North to the Keys down South, from the Chesapeake Bay back East to the Catalina Islands out West. We've experienced the rigors and extremes of the outdoors as we have learned what these products need to give satisfying service for years. That is precisely what our outdoor furniture provides today.

All pieces begin with a heavy gauge steel core to which a smooth UV-stabilized plastisol coating is added. Frames for benches and tables have a powder-coat finish that, like the plastisol coated steel tops and seats, stands up well to nature's nastiest onslaughts.

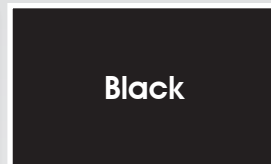

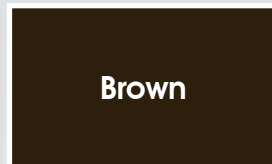

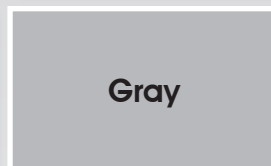

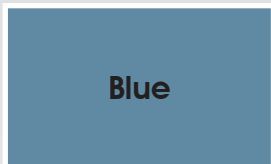

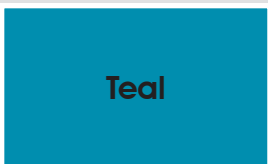

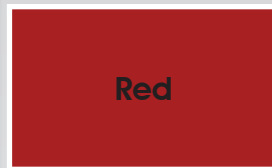

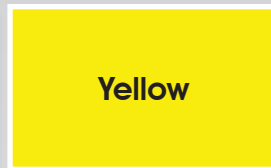

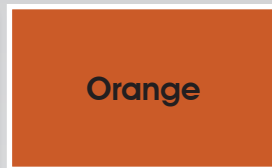

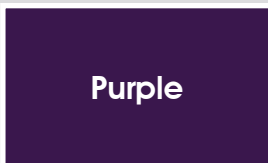

We invite you to see what we offer in the pages that follow, and then to contact us to find out specifically how we might help you satisfy your outdoor furniture needs and desires.

- Tables & Benches **Page 109**
- Decorative Benches **Page 119**
- Accessories **Page 123**
- Grills **Page 123**
- Bicycle Racks **Page 123**
- Timber Borders **Page 123**
- ADA Access Ramps **Page 123**
- Trash Receptacles & Acc. **Page 124**

Choose from 14 Colors

With 14 available colors to choose from for tops, seats and frames you can coordinate your amenities to your play structures, shades and shelters.

Note: Due to printing process, colors shown may vary from actual products; please contact your dealer for color samples.

Canteen Series

Our Canteen Series tables and benches feature tops and seats made with 3/4" #9 expanded metal. They are welded inside a strong 2" angle iron frame with a protective plastisol coating. Additional bracing under the frames uses 1 1/2" X 1/4" flat steel which is important to keep the rounded corners and frame edges straight and good looking over years of hard abuse. These tables are perfect for food courts and courtyards.

Canteen Portable Tables

Made from Recycled Materials!

T8PP

Plasti-Plank™

Playland now carries Plasti-Plank™ site furnishings. Plasti-Plank™ picnic tables and benches are your solution for recycled site amenities with all of the desirable non-corrosive qualities of recycled plastic lumber and the added strength of steel. Steel is the world's most recycled and recyclable material. From old cars to old appliances, the steel in Plasti-Plank™ is recycled and re-created into colorful, durable tables and benches.

T46INFINNV

Infinity Innovated

Our Infinity Innovated Series features tops and seats made with small hole (1/2") 11 gauge punched steel welded inside a strong 2" angle iron frame with a protective plastisol coating. The tops and seats still have the same sturdy 2" border, but with an angled sloping design that gives the table a whole new look. Additional bracing under the frames uses 1 1/2" x 1/4" flat steel which is important to keep the product straight and good looking over years of hard abuse.

Infinity

Our Infinity Series benches and tables feature tops and seats made with 3/4" #9 expanded metal welded inside a strong 2" angle iron frame with a protective plastisol coating. The tops and seats have the same sturdy 2" border, but with an angled sloping design that give the table a unique look. Additional bracing under the frames uses 1 1/2" x 1/4" flat steel which keeps the rounded corners and frames straight and good looking over years of hard abuse.

Web

The Web Series Tables offer easy access to seating and convenient clean up beneath. You can choose from the wide selection of patterns for the tops and seats. The 2 7/8" OD frames add strength and durability. Mounting plates are standard and can be either bolted down for surface mounting application or left un-bolted for portable applications. Stationary frames with an extra 30" length on the frame legs to allow for inground mounting are also available. Surface mount covers (SMLCOVER) are available for that final finished look, see page 109.

Play it Cool in the Shade

Playland provides superior shade products for virtually every type of playground and outdoor situation - no matter the size, shape or location.

The management team at Playland has over 45 years of shade and recreation products experience, both here in the U.S. and abroad. We have created and installed canopies in some of the world's most sun-intense locations, including south Florida, Australia, the Caribbean and South Africa.

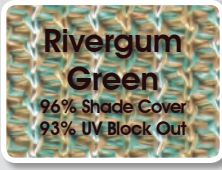

Our fabrics come in a wide variety of colors and provide up to 99% protection from dangerous Ultraviolet (UV) Radiation, as measured by the Ultraviolet Protection Factor (UPF) rating.

Our products are built to last.

Just a few of the benefits of Playland shade include:

- Our fabrics provide up to 99% UV protection, which protects from painful and even cancerous sunburns
- Protects your play equipment investment
- Your play structures will be cooler to the touch
- Our fabrics provide 80% water repellency
- Around sports fields our canopies give protection from misdirected, high-flying balls
- Our patent pending Glide Elbow enables you to quickly remove and re-install canopies in the event that severe weather is in the forecast.
- Both our high-gloss powder-coated steel frames and outstanding UV block fabrics come in a wide variety of pleasing colors, which you can mix and match as you choose.

Available Fabric Colors

12 great colors to choose from! Due to printing process, colors may vary from actual product, please contact your dealer for accurate color samples.

Squares & Rectangles

Our square and rectangular shapes are great for:

- Picnic Areas
- Water Parks and Pool Decks
- Playgrounds
- Bleachers
- Dugouts
- Concession Areas

At the core of Playland's shade offerings are our Square and Rectangular designs which deliver remarkably efficient and economical shade protection. They're available in a wide variety of sizes, heights, colors and fabrics - all of which can be coordinated to meet your location's individual requirements.

Polygons

Our polygon shapes are great for:

- Picnic Areas
- Playgrounds
- Concession Areas

If you want to create a more unusual, creative look, our polygon structures provide the right touch. Of course they still deliver all the protection and durability of our other shapes - they just do it with more flair.

So let your imagination go. Our designers will work with you to produce a fresh, colorful structure that will express your location's unique personality.

Sails

When you have a project that you want to truly stand out - or when you have an odd-shaped location where post locations must conform to restrictions - our Sail designs are the solution. They can be combined in virtually any combination, and they'll provide both a bold, unique look as well as top-flight UV protection of up to 99%.

You name it - whether it's an amphitheater, a sports field, or a large spectator seating area - our distinctive Sail shape will both serve your location and set it apart in excellent style.

12'x24'

\$1,800

Cantilevers

Our cantilever and minimal post shapes are great for:

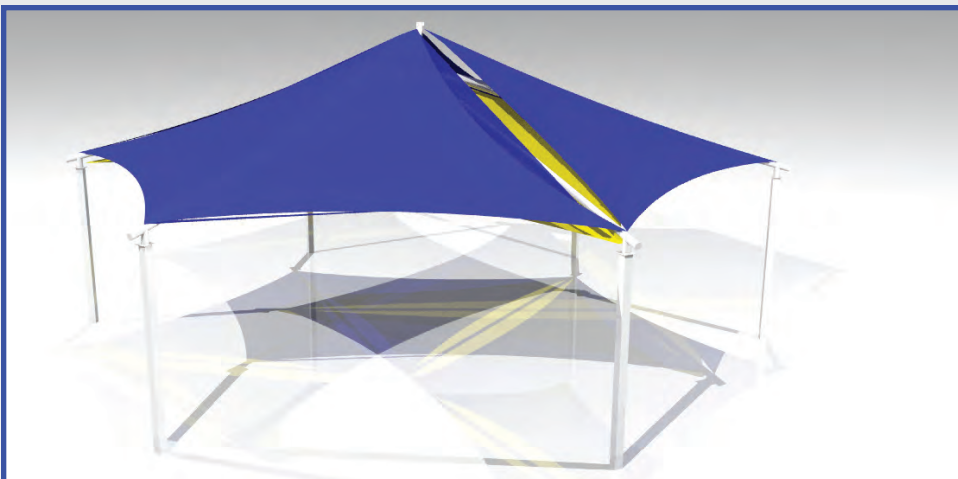

- Parking Areas
- High-Traffic Areas
- Pool Decks
- Picnic/Seating Areas

Many locations require the use of as few posts and/or footings as possible. A design that works most effectively in those areas is our Cantilever Shade, because that shape is engineered to provide maximum shade with minimal obstructions. Our Cantilever designs are available in a number of different overhangs, lengths and heights - all of which offer the same fabric styles, colors and easy-fastening features of our other shapes.

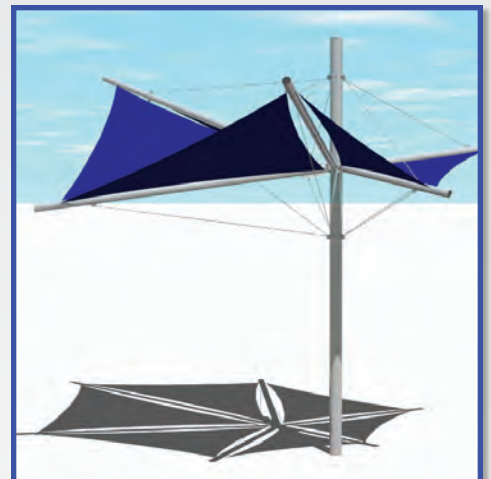

81'x18'

Custom

We've yet to meet a space we couldn't figure out how to protect and beautify. So don't hesitate to talk to us about your most difficult project. We love to solve a shade challenge as economically and creatively as possible!

When you work with us, you'll see that our customer service, designs, durability and our "Can-do" attitude are all superior in every way!

Architectural Elegance, Shelter from the Elements

Playland now offers architectural elegance for your park environment. Provide shelter from the rain or sun with one of our beautiful steel or wood structures. Choose from one of our standard designs and dress it up with our numerous options or allow our design department to create a custom masterpiece to fit your need. Whichever you choose, you'll be pleased to have one of our superior structures.

Model 8S48-TG-3T-C Custom 48' Steel Frame Eight Sided
3-Tier Shelter with handrails, fretwork and a cupola

Multi-Tier

Our standard shelters can be turned into eye-catching centerpieces for a park or landscape setting by adding a second or third tier. The 2-tier and 3-tier options are available for most steel frame shelters.

Pictured: Model 6S24-AS-2T-C
24' All-Steel Six Sided 2-Tier shelter with a cupola

All Steel Hipped

All Steel Hipped Shelters have a 4:12 roof pitch, and a 20' bay spacing.

Standard sizes: 16', 20', 24', 30' and 40'

Standard lengths: 24', 44', 64' and 84'

Available in 16', 20', 30', 40' and 50'

Playland General Guarantee:

- Playland warrants its play structures to be free from defect in materials and workmanship during installation and normal use.
- Playland Further Warrants the Following:
- Limited Lifetime Warranty on all Galvanized Steel Posts, Stainless Steel Hardware, Aluminum Fittings and Aluminum Post Caps.
- Limited 15-Year Warranty on all Punched Decks.
- Limited 10-Year Warranty on all Rails, Rungs, Loops, Rotomolded Components and Plastic Sheet Components.
- Limited 1-Year Warranty on all Moving Parts, Swing Seats, Swing Hangers and other material not covered above.

The warranty stated above is valid only if the structure is installed in conformity with the installation instructions provided by Playland using parts approved by Playland. All parts are to be subject to normal use for the purpose of which the parts were designed. Prior to installation, the parts are not to be subject of vandalism, misuse, neglect or accident. Parts are not to be altered, modified or repaired by anyone other than Playland.

This warranty does not cover cosmetic items (i.e. scratches, dents, fading, discoloring, weathering), paint or decorations, and normal wear and tear.

Playland shall deliver the repaired or replacement part or parts to the site free of charge, but will not be responsible for labor or the cost of labor on replacing these parts. Replacement parts shall be covered under the original warranty.

This warranty is exclusive and is in lieu of all other warranties, whether expressed or implied, including but not limited to any warranty of merchantability or fitness for a particular purpose. Further, no representation, written or oral, of any Playland sales representative may be substituted for the afore described exclusive limited warranty. To the extent permitted by law, Playland shall not be liable for any direct, indirect, special, incidental or consequential damages, which are expressly excluded from this sale.

Terms and Conditions

Pricing: Prices do not include delivery and installation charges and are subject to change without notice.

Terms: Net 30 days from date of invoice for those with approved Playland credit, 1.5% per month there-after; freight charges are prepaid and added to invoice. To all others: Payment in advance.

Taxes: Prices do not include applicable taxes, if any.

Delivery: Delivery of products is by common carrier. Should there be damages or shortages, notify carrier at once and sign the delivery receipt noting the damages or shortages. Should it be necessary, we offer the service of filing freight claims for customers, unless 3rd party freight is requested. We will need the original freight bill showing the shortage or damage and the signature of the driver.

Weights: The weights shown are approximate and may vary.

**In order to honor our commitment to quality and safety,
Playland reserves the right to make changes to any product shown in this catalog.**

1401 Enclave Parkway, Suite 200, Houston Texas 77077 USA

This approval is carried out in accordance with the LRQA assessment and certification procedures and monitored by LRQA.
Macro Revision 13

Play with Color

Color makes a playground as much fun to see as to play on! Playland has the most popular colors and a great plan for how to put them together. Just follow the outline below, and remember, your local representative or one of our staff will be happy to help you. We love to explore the color dimension and we will show you a complete 3D computer rendering of your playground in the colors you picked. If you wish to change them at this stage - it's easy!

When you are ordering colors, think about your playground setting and type of use. A playground can easily blend with the environment by using earth-tones or be bright and playful by the use of primary colors. School colors, club colors, or just your own color scheme are all available.

All Playland metal components are painted by a process called powder-coating. This is a superior, high-gloss, no-peel finish. Powder-coating is better than any other painted coating because it is baked on the metal. All Playland plastics contain UV stabilizers for long lasting fun under the sun. In addition, they are resistant to mold and mildew, making them very easy to clean.

Every modular Playland playground is available with a maintenance kit. The kit contains touch up paints that are color matched to your unit. If a metal component is scratched, it can be

touched up immediately with this quick dry paint. The kit also contains tools and instructions for that all-important preventative maintenance. By using these tools and this guidebook, you and all of the children will have years of great, safe fun - and more Play-on Power!

Note: Due to printing process, colors shown may vary from actual products, please contact your dealer for color samples.
