SUMMIT BOULDER

8ft. W X 9ft. L X 9ft. H -1400 LBS.- INCLUDES 50 HANDHOLDS
PRICE: \$14,750.00 plus shipping

BUILDING IT REAL

Sport Rock Intl., Inc., one of the nations leading manufacturers of climbing walls, has developed an incredibly realistic boulder with an unsurpassed aesthetic appearance and the incredible real feel of a natural rock surface.

The climbing surface is made of a specially formulated ceramic based resin (CBR) with a reinforced polyester interior laminate for strength and durability. Grey or brown granite are standard colorations. Custom colorations and sizes are also available.

Stainless steel receivers are cast directly into the exterior surface, which allows the use of our modular color matched handholds. The handholds can be rearranged with a special tool to create very easy climbing or spaced to create more difficult problem solving situations. In addition to the Sierra and Summit we offer a smaller set of boulders called the Cascade series..

These strong and lightweight boulders are a great addition outdoors in playgrounds and parks for climbing or in a residential landscape where the real look and feel of natural stone can enhance any surrounding.

Industry approved fall protection required for all boulders.

CASCADE BOULDERS

FOR PLAYGROUNDS, PARKS
AND RESIDENTIAL PLACEMENT

Sport Rock Intl., Inc. has expanded its line of boulders to include a smaller set called the Cascade series.

As the perfect complement to our popular Summit and Sierra boulders, our new Cascade series will surely be a hit as the "new rock on the block."

The strong and lightweight Cascade can be placed outdoors in playgrounds and parks for climbing or in a residential landscape where the real look and feel of natural stone can enhance any surroundings.

Built to invite and challenge younger climbers, the Cascade series provides the most realistic look and feel available. The interchangeable handholds provide a different climb whenever desired and reduce the maintenance required of polished routes.

The Cascade is available in the three sizes shown with the color option of grey granite or brown granite, our standard colorations.

Cascade #1 includes 30 handholds, #2 includes 20 and #3 includes 15. Shipped in one piece on its own pallet, the lightweight Cascade is ready for an easy installation.

Industry approved fall protection required for all boulders
