KEY FEATURES:	Increased Safety. Ease of Installation. System Discounts Available

ORIGINAL CONDITIONAL LIMITED WARRANTY

Zeager warrants its premium & recycled Woodcarpet® System 11 to meet ASTM F1292 at a 12 foot fall height when using a 9 inch layer of Woodcarpet® for a period of 20 years.

Installation and maintenance in accordance with Zeager's specifications, using Zeager materials, is required. A complete set of installation instructions, maintenance instructions and warranty are available at www.zeager.com.

MAINTENANCE RECOMMENDATIONS

DAILY MAINTENANCE

1. Visually inspect and remove all foreign material (trash, stones, branches, etc.).

WEEKLY MAINTENANCE

1. Rake the Woodcarpet® as necessary to keep the surface level and the depth sufficient throughout the play area. Woodcarpet Mat® will reduce or eliminate the need to rake the engineered wood fiber.

MONTHLY MAINTENANCE

1. In the play structure use zones, dig down to the subsurface or drain system and measure the depth of Woodcarpet.® Top off as needed.

NOTES:

1. Woodcarpet® contains fresh wood. Fresh wood contains tannins, which are a natural preservative found in living plants and trees that rain will eventually wash out of the Woodcarpet® into the drain system. This dark brown residue is externally harmless to humans and should gradually diminish.

2. During freezing conditions, Woodcarpet® will likely be less resilient, particularly with poor drainage. Restrict use of the area accordingly.

3. A complete set of installation instructions, maintenance instructions and warranty are available at www.zeager.com.
